Dear President of Japanese Psychological Association,

On behalf of the Korean Psychological Association, we wish to extend our deepest condolences and support to our colleagues of JPA, and to the people of Japan. We are very saddened to hear about the losses of so many precious lives in Japan, and are concerned for the safety and wellness of our Japanese colleagues.

We heard many tragic stories from the news, but we also hear touching stories. We read comments made by the journalists about how impressed they were to see the Japanese survivors making efforts to maintain public order and to show patience despite the chaos and lack of necessities. Such wisdom and strength of the people of Japan are invaluable resources that will help you get through this difficult period.

Although we can only express our thoughts and hope in words at this moment, we would like to let you know that the KPA is willing to take part in supporting colleagues of JPA during the recovery and healing process in the months to come. Please let us know if you think we could be any help. We are here for you both in heart and in action.

Again, we send you our whole-hearted support and hope.

Sincerely,

March 14, 2011

ChongNak Son 
President
Korean Psychological Association

The Korean Psychological Association
